Garrett

Leather

Welcome to Garrett Leather Corporation, the world's largest, individually owned, Italian upholstery leather distributor.

For over 20 years, Garrett's products have been specified for private and corporate aircraft, furniture upholstery, corporate, residential and hospitality interiors, private yachts, motor coaches and automobile restoration.

Garrett's superior quality products, huge selection, unmatched customer service, and exceptional value have made Garrett Leather the preferred leather supplier for upholsterers and designers worldwide.

Garrett Leather Headquarters - Buffalo, New York

Kenya Sapphire in the lobby of the Roger Williams Hotel in New York City.

Quality

Garrett's premium European raw materials are tanned in Italy, resulting in superior quality products with higher cutting yields. The finished hides are carefully hung on "horses" rather than stored in tubes to prevent wrinkles and creases from forming.

Selection

Over two million square feet of upholstery leather and a variety of specialty products are available in over 500 colors.

Convenience

Most of Garrett's products are in stock and ready for immediate shipment. Over 90% of all orders ship within 48 hours of purchase. All major credit cards are accepted.

Environmentally Friendly

Garrett leather consists of 100% organic reclaimed material that would otherwise end up in landfills. The tanning agents used are composed of natural minerals and all surface finishes are water-based. Garrett's products are GREENGUARD Indoor Air Quality Certified®. Leather is exceptionally durable, lasting up to five times longer than other fabrics, thus reducing maintenance and replacement costs, as well as waste.

GSA Approved

Garrett Leather is an approved vendor for the General Services Administration. Government projects qualify for exclusive GSA pricing.

Burn Certification

Most of Garrett's colors are treated to pass industry flammability requirements during the tanning process, at no additional charge. Certification is available upon request.

Superior Customer Service

Garrett's service representatives are second to none in the industry. Friendly, knowledgeable customer service representatives will answer all of your questions and send your samples to you in a timely fashion.

High Cutting Yields

Garrett's superior, extra large hides provide higher cutting yields with minimal waste.

Half Hide Minimums

Garrett accepts half hide orders without imposing any additional cutting fees.

Fiberdye® Color

Garrett's exclusive Fiberdye® is the dyeing process that results in true color permanence. Fiberdye® penetrates all layers of the hide, producing deep, vibrant, durable colors. Look for Fiberdye® when purchasing quality leather.

Custom Color Capabilities

Garrett Leather offers custom colors. Please call for a quote and lead time.

Water Resistance

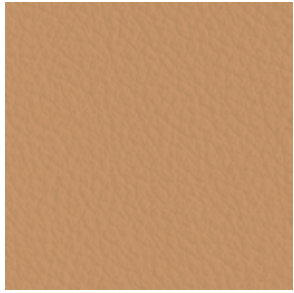

All of Garrett's semi-aniline products have water and stain repellents dyed into the leather for moisture resistance.

UV Protection

All of Garrett's semi-aniline products have durable surface finishes that guard against fading, cracking and peeling.

Global Support

Garrett has sales representatives and showrooms worldwide.

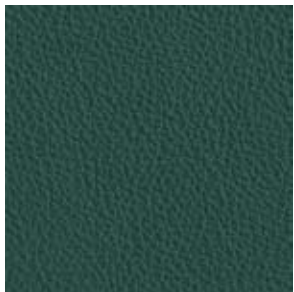

Avion

Garrett Avion™ is semi-aniline leather produced from European cowhide. All Avion colors are treated during the tanning process to meet industry flammability requirements. A dual enhanced grain provides uniformity and consistency throughout the hides. The durable finish offers excellent resistance to wear. Avion is recommended for all upholstery applications, especially high traffic areas.

Distressed

Distressed is full grain, pure aniline product with no pigmented surface protection. These European cowhides are tumbled with paraffin wax, producing unique variations in texture and color. A light wax coat is added to provide increased moisture resistance. Color variations and natural marks are inherent characteristics of this leather. This product will darken with use and develop a rich patina over time.

Berkshire

Berkshire is semi-aniline leather produced from European cowhide. A beautiful subtle enhanced grain pattern provides excellent cutting yields. Recommended to customers who are looking for minimal natural markings, Berkshire offers exceptional durability suitable for all upholstery applications.

Glazed

Garrett Glazed™ is semi-aniline, enhanced full grain leather. The hides are milled in heated drums then re-tanned using a special process that imparts a smooth surface and a very fine grain. The beautiful mottled appearance highlights the style of this classic leather. The spill resistant, high gloss finish makes Glazed a durable option for high traffic areas.

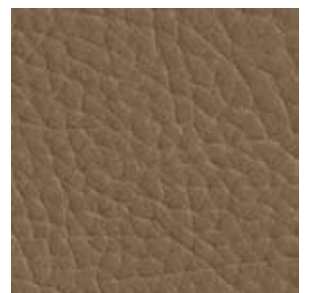

Caressa™

Caressa™ is full grain semi-aniline leather produced from premium selection European cowhide. Caressa™ has a light finish, providing a calf-like softness and a supple hand. The subtle sheen accentuates the true beauty of this leather, making it an excellent choice for most upholstery applications.

Kenya

Kenya is Garrett's enhanced grain nubuck. Made from the desirable top layer of the hide, Kenya is not to be confused with a true suede, which is made from the less desirable split (lower layers of the hide). Kenya offers a higher cutting yield, making it an excellent alternative to smaller split suede. Light surface protection is applied. Kenya is recommended for low to moderate traffic areas.

Chatham

Garrett Chatham™ is full grain semi-aniline leather. No corrections or alterations are made to the natural grain during the tanning process. The soft yet durable matte finish provides excellent resistance to wear. As one of Garrett's best-selling products, Chatham is recommended for all upholstery applications.

Luxianna™

Luxianna™ is full grain European bullhide, providing more density and a stronger fiber structure than cowhide. Each hide is vacuum dried to produce a tight grain and heat rolled to create an elegantly smooth surface. A light, organic finish is applied, allowing the product to wear into a beautiful, vintage look. Luxianna™ is recommended for low to moderate traffic areas, as marks and scratches will appear with use.

*Images shown 100% to scale.

Mystique

Garrett's Mystique is created using sizable European bullhide, providing more density and a stronger fiber structure than cowhide. A labor-intensive process called "hand-tipping" is used to apply a darker "tipped" color onto a lighter tone hide. This unique two-tone effect will show variations in shading from hide to hide and even within a hide. Mystique offers excellent durability and resistance to wear.

Sierra

Garrett Sierra™ is the ultimate in full grain aniline leather. Sierra represents leather in its purest form, with very little surface protection. These extremely supple hides have a soft hand and a subtle sheen. A rich patina will develop over time. Sierra is recommended for most upholstery applications.

Mystique Croco

Premium European bullhide are used in the creation of Mystique Croco. These large, strong hides are embossed with a crocodile pattern, prior to the hand-tipping process. Mystique Croco is available in both whole and half hide sizes and is suitable for all upholstery applications.

Torino

Torino is semi-aniline leather produced from European cowhide. Torino has a rich hand and a welcoming texture. These full-bodied Italian cowhides have a uniform, pronounced pebble grain that provides consistency, durability and superior cutting yields. Torino is highly water resistant and is recommended for all upholstery applications.

Newport Club

Garrett Newport Club™ is produced using premium selection bullhide. These full grain hides are chrome tanned to create softness, then re-tanned using vegetable tannins, resulting in well-rounded leather with a beautiful natural grain. Additional dyes are hand-padded into the surface to create deep, rich colors and a gorgeous subtle sheen. Newport Club is a luxurious option for all upholstery applications.

Vintage

Garrett Vintage™ is full grain, pure aniline leather. Oils and waxes are used to create a "worn" look and light "pull-up" effect. Additional dyes are hand-padded on the surface to add a beautiful mottled effect and to add depth to the final appearance. Natural marks and variations in each hide represent the true character of leather. Heat and pressure are used to create the gorgeous final sheen.

Pearllescence™

Pearllescence™ is enhanced full grain, semi-aniline leather with a beautiful luster. A specially formulated finish with a pearl additive gives the hides the metallic and pearl appearance. This combination pearl finish provides durability and increased water resistance. Slight color variations may appear from hide to hide. Pearllescence™ is recommended for all upholstery applications.

Sheepskin

Garrett's Sheepskin is used primarily for pilot seats in aircraft, automotive seats, and as throw rugs in finer residences. The fleece on Garrett's standard Sheepskin is straight, also called ironed, unclipped, with a length of approximately ¾". Many colors are available in natural curly fleece as well. Garrett's Sheepskin average nine square feet.

*Images shown 100% to scale.

*Images shown 100% to scale.

Steerhides

Garrett offers three categories of Steerhides: natural, stenciled and specialty. Unlike other leather products, the hair is not removed from the hides during the tanning process. These hides are used for rugs, wall hangings, and upholstery.

Garrett's natural Steerhides represent genuine cowhide and are not dyed. Each hide will have varying color patterns. As with all animals, no two are exactly alike. The texture, color and pattern of the hair will be different from hide to hide.

Garrett's stenciled Steerhides include tiger, leopard, and zebra. These stenciled patterns are all printed on cowhide. All natural and stenciled Steerhides are sold in whole hides only and average 35 square feet.

Garrett's Specialty Steerhides are created using a variety of different finishing techniques including embossing, metallic prints, rolling, and laser cutting.

Wovens

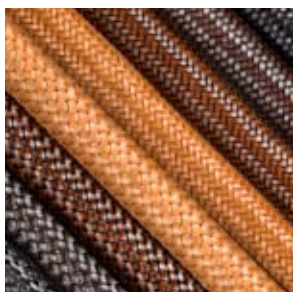

Garrett Wovens™ are created using full grain European cowhide. Garrett Wovens™ are 100% vegetable tanned, providing firm leather that gives the weave a structural integrity that is not possible with standard, soft upholstery leather. Hand staining with transparent dyes gives the leather a depth of color that is unattainable with typical, semi-aniline leather finishes. The leather is then cut into strips, which are edge dyed with a darker color to define and accentuate the final patterns.

The strips are woven into various patterns, including all leather, leather and fabric, or leather and metal combinations. Each pattern is backed with cotton fabric for extra stability. Over time, these products will age gracefully and develop a rich patina.

All Garrett Wovens™ are sold by the yard in half yard increments.

Tubular Wovens

Tubular Wovens are produced from full grain Italian cowhide. The leather is woven together into a tube shaped roll, without any seams. Tubular Wovens simply slide over any tube shaped fixture such as curtain rods, bedposts, lamp posts, door pulls, or hand railings.

Tubular Wovens are sold in half-yard increments with a one-yard minimum. Three sizes are available; small has an inside diameter of 1", medium has an inside diameter of 1 3/8", and large has an inside diameter of 1 7/8".

Welt Cord

Garrett offers pre-made welt cord. Simply specify the leather and color of your choice. Welt cord is used as trim around furniture, cushions, and pillows.

Braided Welt is made from the same full grain, hand-stained leather as Garrett Wovens™. A cotton fabric sewing allowance is intertwined with the leather, providing easy application and superior strength and durability. Braided Welt is available in seven colors.

All Welt is sold by the yard. Approximate outside diameter of the cord is 1/4"- 3/8". Diameters vary depending on the type of leather that is requested. Approximate outside diameter of the cord for Braided Welt is 5/16". All welt cord has a 1/2" sewing allowance. The average length between seams is 65"-68".

Thread

Garrett offers matching 69 pound nylon sewing thread to match most leather colors. All thread is in stock and sold in four-ounce spools. Matching "G" bobbins are sold by the gross. Garrett's thread meets industry standard UV protection of 95 hrs.

Leather Accessories

Leather accessories are available in any Garrett color. Each piece is handcrafted in the United States and wrapped with Garrett's leather. Two styles are available; the Classic style has smooth surfaces, while the Premium style has padded and stitched surfaces. All accessory orders are done on a custom order basis. Please allow four weeks for delivery.

Impress

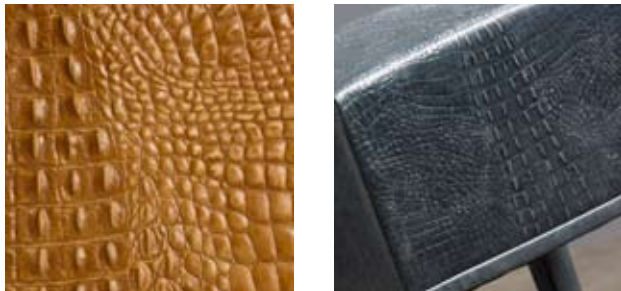

Garrett's Impress patterns are produced using a combination of heat and pressure to emboss specific patterns on finished leather. Over 30 patterns are available on more than 400 colors, in half hide increments. Lead time for all Impress orders is two weeks from the receipt of the confirmed purchase order and applicable deposit.

Shown (L-R): Quill, Basket, Turtle, Florida Gator, Bark, and Large Diamond.

Caiman Embossing

Caiman is an exotic reptile pattern that is embossed on any Garrett Distressed or Vintage color. Caiman hides are embossed in Italy and are available in both whole and half hide sizes.

Shown (L-R): Closeup of Caiman Distressed Pecan; ottoman with Caiman Distressed Denim.

Custom Embossing

Have your corporate logo or any custom design embossed on leather. Send your artwork with actual dimensions to Garrett for a price quote. A custom mold will be made and a sample will be provided for a small fee. Orders will be filled upon final approval of sample. Please allow three weeks for a sample and another three weeks for production.

Custom Laser Embossing

Laser embossing creates beautiful patterns on leather using heat and computerized lasers. Send your artwork with actual dimensions to Garrett for a price quote. Upon request, a sample with your design will be provided for a small fee. Once approved, your order will begin production. Please allow three weeks for delivery.

Shown (L-R): Laser embossing on Natural Steerhide, laser embossing on Mystique Cashmere.

Perforating

Perforating may be done in 11 different patterns on any type of Garrett leather, with the exception of Wovens, Steerhides, and Sheepskin. Garrett will perforate any customer supplied leather as well. All perforating is done in half hide increments with a ten-day lead-time.

Shown: Hampton pattern.

Skiving

Skiving is a method used to reduce the thickness of leather hides to 0.7mm or 0.8mm. Any Garrett hide or customer supplied leather may be skived. Skiving is done with a two-week lead time. A half hide minimum order is required.

Cut-to-Pattern

Garrett Leather will cut your sewing patterns to your specifications. Send your patterns with quantity requirements for a price quote and lead-time. Garrett will provide cut samples of your patterns for a small fee. Upon approval of the samples, Garrett will cut the required quantity.

Flameproofing

Many of Garrett's products are treated during the tanning process to meet industry flammability requirements. Products that are not treated during the tanning process may be treated at Garrett's facility at no additional charge. Certification is available upon request.

Where your vision becomes reality.

As a subsidiary company of Garrett Leather, Sky Rugs allows you the freedom to choose from Garrett's extensive product offerings to produce your own handcrafted leather floor covering.

Visit www.skyrugs.com to view the Online Rug Designer!

Custom Rugs

Sky rugs are handcrafted in the U.S.A., utilizing natural materials. The unique, multiple layer construction is both durable and comfortable, providing a soft, luxurious cushion. The corners are hand-wrapped securely in place, creating a durable smooth surface.

Sky rugs feature a soft, protective monk's cloth for the bottom layer as a non-scratch surface. The finished thickness ranges from .375" to .5", depending on the materials.

Shown: Cardinal Checkerboard Woven border with White Specialty Steerhide center.

Patterned Steerhide Rugs

Handcrafted in Italy from premium Italian hides, Patterned Steerhide Rugs are available for next day delivery in eighteen combinations of color, pattern and size. Five geometric patterns come in black & white and brown & tan pairings.

Patterned Steerhide rugs feature natural hair-on hides and are not dyed. Each rug is backed with a spunbonded 95% polypropylene (5% other materials). An anti-slip finish keeps the rug thin (perfect under furniture) without the need of an additional pad. The finished thickness is approximately .075" to .1".

Shown: Black and white diamond pattern.

Rug Binding

Sky Rugs offers rug binding in nine different sizes ranging from two to six inch widths. All rug binding is sold by the yard. Over 400 leather colors and patterns are available.

Shown: (row 1) Saddle Impress pattern on Vintage Elk, Distressed Brass; (row 2) Newport Club Scotia, Kenya Crepe, Medium Brindle Steerhide; (row 3) Pearlescence Azurite, Luxianna Root Beer, Caressa Red and Berkshire Black.

Receive a **FREE** handbag or accessory from Garrett!

As a customer of Garrett Leather, you may earn discounts to use towards the purchase of a leather handbag or accessory, up to 100% off.

→ % discount =

How It Works:

For every \$1,000 order placed with Garrett Leather, you will receive a discount code for 10% off a leather handbag or accessory. (ie. a \$5,000 leather order will qualify for a 50% discount redeemable at www.garrettbags.com)

Once the leather order has shipped, you will receive your coupon code **via email**. If you purchase more than one handbag, your discount code will be applied to the most expensive item.

Discount codes are valid for **90 days** from the leather order invoice date and are valid for one time use.

Every Garrett Leather order placed that exceeds \$1,000 will be combined to increase the value of your discount, for up to 90 days. Every time the value of your code is increased, the expiration date will be extended for another 90 days.

Visit www.garrettbags.com to view the value and expiration date of your discount code at any given time.

FREE ground shipping within the continental United States.
