

TANNERY AUDITS	DESCRIPTION
	The LWG (Leather Working Group) Leather Manufacturer Audit Standard is designed to provide transparency and accountability within the leather supply chain. This standard is used to assess leather manufacturers on the following aspects: Water & Energy Usage, Solid Waste & Effluent Management, Air & Noise Emissions, Traceability, Health & Safety, Chemical Management, Restricted Substances, and Compliance & Chromium VI (CrVI) Management.
	REACH is a regulation of the European Union (EU), adopted to improve the protection of human health and the environment from risks that can be posed by chemicals. To comply with the regulation, European companies must identify and manage the risks linked to the substances they manufacture and market in the EU. Leather manufactured in Europe is Reach compliant.
CERTIFICATIONS	DESCRIPTION
	<p>The UL GREENGUARD Gold Certification Standard includes health-based criteria for chemicals and also requires lower total VOC emissions levels to ensure that products are acceptable for indoor environments. Volatile Organic Compounds (VOCs) are carbon-based chemicals (such as formaldehyde) that easily become vapors or gases. Representative samples of certified products have undergone rigorous scientific testing to meet stringent chemical emissions requirements. UL GREENGUARD Gold Certified® products limit emissions of more than 360 VOCs and total chemical emissions.</p> <p>All our semi-aniline and pure aniline collections achieved GREENGUARD GOLD Indoor Air Quality certification.</p>
	<p>MSAP (MindClick Sustainability Assessment Program) rates social and environmental impacts throughout the product lifecycle. MindClick assigns a score out of a possible 200 points based on nine key metrics; Materials, Chemicals, Human Rights, Manufacturing, Packaging, Distribution, End of Use, Health and Hotel.</p> <p>MSAP consolidates the results through ratings; Starter, Achiever and Leader; making it easy to compare products.</p> <p>All our semi-aniline, pure aniline, and nubuck collections achieved MindClick Leader status.</p>
	<p>A product's compliance with the LBC Red List is represented on the Declare label by the product's Declaration Status. There are three Declaration Statuses: LBC Red List Free, LBC Red List Approved and Declared.</p> <p>Many of our collections achieved LBC Red List Free, the highest rating of Declaration Status.</p>
	<p>LBC RED LIST FREE products disclose 100% of ingredients present at or above 100 ppm (0.01%) in the final product and do not contain any Red List chemicals.</p> <p>LBC RED LIST APPROVED products disclose a minimum of 99% of ingredients present in the final product and meet the LBC Red List Imperative requirements through one or more approved exceptions.</p> <p>DECLARED products disclose 100% of ingredients present in the final product but contain one or more Red List chemicals that are not covered by an approved exception.</p>
DIGITAL LIBRARIES	FIND OUR SUSTAINABLE PRODUCTS ON THESE PLATFORMS
	Design for Health is a digital studio for healthy interiors; a trusted source for healthy A&D product specification. Vendors are rated based on MSAP (MindClick Sustainability Assessment Program).
	Garrett Leather was an early adopter of Material Bank, recognizing the value of designers' ability to find samples from multiple vendors in one place thereby reducing carbon emissions.
	Mindful Materials is a digital library of sustainable materials. It uses combined human health and environmental information from leading manufacturers to help designers make better choices.
